Subject: Izmjena u Komisiji za informatiku i telematiku
To: <jasmin.ademovic@sarajevo.ba>, nihad uk <nihaduk@gmail.com>

Pozdrav Jasmine i Nihade,

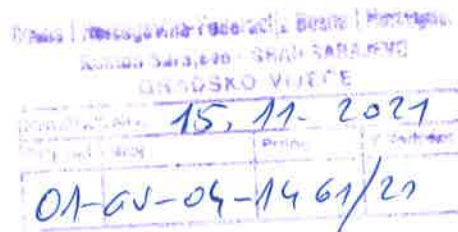

Obavještavam vas da Naša stranka mijenja člana Komisije za informatiku i telematiku, pa će umjesto Adla Kupusović član ovog radnog tijela biti Adi Omerbegović.

CV u prilogu. Uskoro verzija na bosanskom jeziku.

Molim Vas da na sjednici Komisije za izbor i imenovanja uskladimo prijedlog odluke o izmjeni člana ovog radnog tijela.

Srdačan pozdrav.

Adi Škaljić

SUMMARY OF SKILLS

- Experienced in creation of detailed test plans, test cases, test scripts and test reports
- Experienced in testing of web, desktop and mobile applications
- Experienced in working with MISMO 3.3, 3.4, 3.1, 2.3 (Closing, Title and Appraisal)
- Working on MISMO - MISMO Integration, MISMO translation
- Experienced in validating of MISMO mappings
- Experienced in working with XML
- Possession of analytical and troubleshooting skills
- Working on functionality, load, stress and performance testing
- Automating test cases with C# (Selenium)
- Automating test cases with Protractor
- Automating mobile test cases (Xamarin)

- Technologies:
 - MS Visual Studio, MS Test Manager, MS SQL Server, MySQL, TFS, Azure
 - Git, Github
 - HTML5 / CSS3 / JS/TS (Beginner)
 - Wordpress
 - Microsoft C# .NET 4.6 (Beginner)
 - Xamarin (Beginner)
 - REST, Fiddler, Postman, Firebug, Bugzilla
 - Selenium IDE and WebDriver (C#)
 - Protractor
 - SpecFlow (Gherkin)
 - Cross Browser Testing, Cross Device Testing
 - Adobe Photoshop/Illustrator/InDesign

WORK EXPERIENCE

Authority Partners, Sarajevo, Bosnia and Herzegovina

Software Developer, January 2020 – 2021

- Finished C# course
- Creating functional mobile pages in Xamarin
- Creating page that is saving and loading data to/from database (Angular, TS, C#)

Authority Partners, Sarajevo, Bosnia and Herzegovina

QA Engineer, January 2020 – 2021

- Setting up Spec Flow on MacOS
- Automating smoke and functional test cases for a mobile application using SpecFlow – iOS/Android
- Manually testing mobile applications on Android and iOS platforms
- Creating test plans, writing test cases, reporting defects on Azure TFS
- Troubleshooting crashes and issues of the apps on different platforms

Authority Partners, Sarajevo, Bosnia and Herzegovina**QA Engineer, January 2017 – 2019**

- Automating manual test cases in C# (.NET framework) - Selenium
- Analyzing and updating failed automation test cases
- Automating scripts to verify responses from API for different types of requests
- Manual and automated testing of REST services
- Validating content of generated PDF disclosures
- Verifying all values are correctly exported to Encompass
- Testing MISMO 3.4 mappings
- Enhancing test frameworks and develop automated tests
- Recording test results and reporting
- Establishing test strategy and manual and automated test suites
- Designing and creating test scripts using C# to address areas such as database impacts, software scenarios, regression testing, negative testing, error or bug retests, or usability in preparation for implementation
- Working with the QA Manager and colleagues to define process and strategy associated with automation
- Strong analytical and troubleshooting skills
- Testing web applications, detailed test plans, test cases, test scripts and test reports

Authority Partners, Sarajevo, Bosnia and Herzegovina**QA Engineer, August 2012 – December 2016**

- Testing Core components of the system – integration, system and performance testing
- Updating MISMO and XML files for triggering different kind of rules inside the system
- Manual testing of SOAP and REST services
- Worked on MISMO 3.3 and MISMO 2.3.1 translations using XSLT stylesheets
- Worked on MISMO integration with custom client XML format

- Writing and execution of complex SQL scripts/queries - for data validation, manipulation and verification purposes
- Analyzing solution and functional documents
- Writing test plans and test cases after analyzing solutions and functional/non-functional requirements
- Tracking, analyzing and documenting defects in Microsoft Test Manager
- Performed various types of testing, such as Functional, Acceptance, Smoke, Regression, Usability, Performance, Stability testing and configuration testing in QA, Staging and Production environments.
- Analysis of use cases, system and business requirements to ensure better quality of test planning and test design phase
- Performed various types of testing, such as Functional, Acceptance, Smoke, Regression, Usability, Performance, Stability testing and configuration testing in QA, Staging and Production environments.
- Planned analysis of use cases, system and business requirements to ensure testability of the product
- Created and executed SQL queries and scripts on SQL server for data validation, manipulation and verification purposes
- Used Microsoft Test Manager to track, analyses and document defects
- Produced test case scenarios based on the functional and technical documentation and updating the existing test cases. Prepared test scripts and executed manual and automated test cases to verify the expected results
- Worked on Performance and Load testing on major components of the system
- Analyze test requirements and provide a solution in terms of test approach and design, suggested tools etc
